

11 GREAT WARDROBE & BEAUTY HACKS

Seriously, who thinks up all this stuff? I love a good hack. I've tried many and trusted a few. Here are some of my favourites. I'll share more in future issues.

1

HOW TO REMOVE LIPSTICK STAINS

Spray hairspray on lipstick stains and let it settle for a few minutes before putting the item in the washing machine.

2

NEW SHOES TOO TIGHT?

Fill a zip-lock bag and place it inside your too-tight shoes - then put them in the freezer overnight. It will expand them so they fit perfectly.

3

WANT A LONGER, FULLER PONYTAIL?

Pull the top half back and put it in a ponytail. Then gather the remaining hair into a lower ponytail. The top ponytail will hide the lower hair tie, making it look like you have one long, high ponytail.

4

TOILET SMELLS?

Light a match and let it burn a few seconds to remove toilet smells instantly. Trust me! This REALLY works!! ☺

5

STRUGGLE WITH EYELINER?

Apply eyeliner to your eyelash curler to curl your lashes and line your lid at the same time. Genius!

6

PET HAIR ON YOUR CLOTHES OR FURNITURE?

To remove cat and dog hair from clothes and furniture, rub them with damp rubber gloves.

7

NEED A QUICK FIX FOR MANICURE MISTAKES?

Keep an extra nail polish brush on hand, and dip it in nail

8

GOT MESSY POLLEN STAMENS ON YOUR CLOTHES?

Take a piece of sticky tape about five centimetres long and gently press the sticky side to the pollen mark and lift off. Repeat with clean sticky tape as required. Do not try to brush it off.

9

CURLS DON'T HOLD?

Divide your hair into segments, curling each around two fingers, and folding it up into aluminum foil squares. Heat each foil pocket with a straightener for about 20-45 seconds. Wait for the foil to cool, and remove. Use hairspray for more hold. Voila!

10

FINGERPRINTS ON YOUR STAINLESS STEEL?

To remove fingerprints from stainless-steel appliances, place a small amount of baby oil on a napkin and wipe the affected areas. The fingerprints will just wipe away.

11

NEED TO GET MORE LIFE OUT OF YOUR MASCARA?

Add a drop of Visine to your mascara to make it last longer. Water works at a pinch, too.
